

This is a Gillig Corporation hybrid diesel-electric bus used by DART in Delaware that is similar to the buses COLTS has purchased.

# COLTS Goes Green

# Hybrid BUSES

## QUICK FACTS:

**Carbon dioxide accounts for 80% of greenhouse gas emissions. The more CO<sub>2</sub> is released into the environment, the more heat is trapped inside Earth's atmosphere.**

**Commuting by public transportation could reduce a person's carbon footprint by 20 pounds a day — that's 4,800 pounds a year — according the American Public Transportation Association.**

**One full COLTS bus could remove up to 40 cars from roads and highways.**
