COLTS to unveil GPS app, trip planner on Monday

Scranton, Pa. – The County of Lackawanna Transit System (COLTS) has launched a real-time bus tracking transit app called myStop®. The technology puts trip planning in the hands of COLTS riders.

Some of the main features of myStop® are Routes, Stops, Trip Planning, and Alerts. The Routes and Stops features allow riders to track the bus via GPS-based technology. Google Trip Planner allows passengers to plan their trip from origin to destination just by typing in addresses. The Alerts function notifies riders of detours, service alerts, and general updates.

“We are excited that to unveil our convenient new mobile app and bus tracking system. It has been a tremendously helpful tool for riders in other transit systems that utilize this same technology, and we expect the same here,” said Executive Director Bob Fiume. “We hope that the real-time information will help our passengers find our transit system easier to use and boost our ridership.”

You can access myStop® on your desktop at <https://coltsivl.availtec.com/InfoPoint> and download the mobile app on the COLTS Web site, coltsbus.com.
